

WHAT TO EXPECT

Invisible Ink Tattoo Removers

MAKE THE DECISION

When it comes to tattoo laser removal, be absolutely confident in your decision. Here's what to expect before, during, and after Invisible Ink's tattoo removal process.

CONSULTATION

An experienced technician considers your tattoo removal through the lens of our 40-factor proprietary Ink Analytics diagnostics (developed by a certified Plastic Surgeon). We'll let you know how much ink we can remove, number of recommended treatments, and a final all-in cost that we will never exceed – guaranteed.

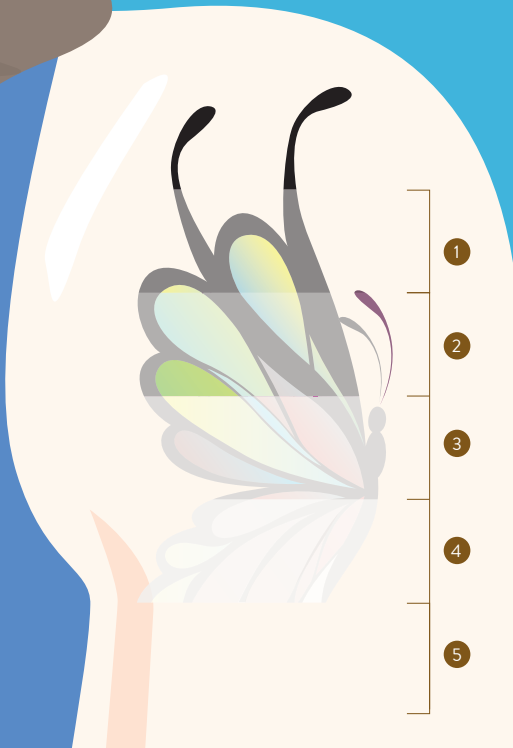

SCHEDULING

For a typical tattoo, Invisible Ink can offer customers a clean slate in as few as 8 treatments (about half the number of treatments as traditional tattoo removal) – each treatment spaced 6–8 weeks apart.

TREATMENTS

LASER FAST. LITERALLY.

Because of how incredibly fast our FDA-approved Pico Lasers work, as well as the Rx-strength numbing cream and skin chillers, discomfort (like the snap of a rubber band) is reduced to only a tiny fraction of what it felt like getting a tattoo in the first place!

GUARANTEED RESULTS

Be absolutely confident with the Invisible Ink Guarantee. Backed by nearly 10,000 successful treatments and counting, Invisible Ink guarantees the amount of ink that can be removed (if not 100%, we'll tell you that too), number of treatments, and the final all-in cost we will never exceed. If we don't deliver the results promised, you will receive free treatments for an entire year.
